E. MADISON MITCHELL, *Registrar.*

Faculty.

Rev. SAMUEL REGESTER, D. D.,

President, and Professor of Moral Science, Political Economy, and Evidences of Natural and Revealed Religion.

Phil Moore Leakin, A. M.,

Professor of Mathematics, Pure and Mixed, including Experimental Surveying, Mensuration, &c.

Nicholas B. Worthington, A. M.,

Professor of Mental Philosophy, English Language and Literature.

R. Douglas Williams, A. M., Ph. D.,

Professor of the Natural Sciences, including Chemistry and its applications, Geology, Botany, and Mineralogy.

Battista Lorino, LL. D.,

Professor of Latin, Greek, French, German, Italian, and Spanish.

E. J. Henkle, M. D.,

Professor of Natural History, Anatomy, Physiology, and Hygiene.

—— ——,

Professor of Agriculture and Horticulture.

—— ——,

Professor of Floriculture, Pomology, and Botany.

Maj. Francis A. Soper, A. B.,

Adjunct Professor of Mathematics and Classics, and Military Instructor.

E. M. Mitchell,

Teacher of Book-keeping and Penmanship.

—— ——,

Professor of Music, (Vocal and Instrumental.)

John A. Veitch,

Teacher of Elocution.

Military Organization.

FRANCIS A. SOPER,
Major and Commandant.

CO. A.

J. Asbury Regester,
Captain.

Robert M. Williams,
First Lieutenant and Adjutant.

R. Saunders Henry,
Second Lieutenant,

Jno. A. Wilson,
First Sergeant.

Turner Hall,
Second Sergeant.

CO. B.

Oliver C. Miller,
Captain.

Walter Worthington,
First Lieutenant.

Jas. T. Perkins,
Second Lieutenant.

John L. Robins,
First Sergeant.

Guy Carlton,
Second Sergeant.

Horace M. Davis,
Sergeant-at-Arms.

Catalogue of Students.

1871-72.

THE MARYLAND AGRICULTURAL COLLEGE

Is situated in Prince George's county, nine miles from Washington, twenty-eight from Baltimore, and three-fourths of a mile from College Station, on the Washington branch, Baltimore and Ohio railroad. The College building, which is spacious and substantial, is in thorough repair, has fine chambers, is well ventilated and warmed, and, lighted throughout with gas, combines every requisite of a comfortable and pleasant home. The location, which experience has proved eminently healthful, is on the edge of a handsome forest growth, and commands a fine view of the picturesque country around it.

Being situated amidst quiet, rural scenes, students at this College are happily removed from those temptations and vices which are so prevalent in cities and towns, and which often affect injuriously the morals of young men.

The earnest joint effort of the Trustees and Faculty is to build up an Institution wherein young men may not only acquire a *thorough* collegiate education, but also become grounded in the principles of moral integrity, sound and varied intellectual culture, and a knowledge of those facts and rudiments which underlie the more thorough preparations for Agricultural, Professional, Mercantile, or Mechanical pursuits.

The design is to make the Institution, in fact, what its name implies, a Maryland *College*, which shall offer inducements to Marylanders to complete their college studies at home, and which shall also be attractive to those outside of the State.

Eight trains (four from Washington, four from Baltimore) stop at the College Station every day, thus affording convenient and speedy access to the Institution.

N. B.—Persons coming to the College are notified to stop at "College Station," on the Washington and Baltimore railroad, whence conveyance will be furnished to the College.

AGRICULTURE.

The peculiar feature of this Institution is the blending of instruction in the theory and practice of agriculture with the usual systematic educational training. The several sciences embraced in the course of study, with such practical observations in the daily lectures as indicate their bearing upon farm operations, and instruction by illustration from the field and garden, are the means used to this end. It is not to be presumed that a young man, in the course of acquiring his education, can make himself a practical farmer, but it is believed that our system of occasional out-door work, in connection with a well-stocked, well-worked farm of 300 acres, and the skilful practice of garden and orchard culture, has in it enough of the merely practical to accomplish our ends—to put the student in the way of becoming a thoroughly informed agriculturist, and thus foster an ardent love for the noble pursuit of agriculture. In this way we hope to arrest and counterwork the tendency of a very large number of our best young men to abandon the real happiness and profits of rural pursuits for the fancied gains and pleasures of city life, in commercial and other employments.

DISCIPLINE.

The discipline of the College is strictly parental in its character. The President and Faculty, residing in the building with the students, and eating at the same table, exercise supervision of their manners and morals.

The aim is to inculcate such lessons, and instil such principles, as shall lead to the formation and growth of true manly character, and thus supplement and foster such impressions as are made in the best regulated homes.

A daily record is kept of attendance, recitation, and conduct. From these daily records a report is sent to the parents and guardians in the middle and at the end of each term.

All delinquencies, whether in lessons or behavior, shall be treated as the demerits of the case demand.

Discipline begins with instruction, and goes on with persua-

sion, remonstrance, rebuke, and punishment, as the case may require, and ends in dismissal, if the offender is incorrigible.

The first lesson a student must learn is that of *obedience to authority.* No one is fit to govern who has not, in his youth, *learned to obey.* Let it be distinctly understood that this Institution is not the place for *idlers, triflers,* or *rowdies.* When a young man enters our College family, he is not only expected to conduct himself with that *earnest application* becoming to a student and a man of business, but also with the *propriety* and *decorum* characteristic of the society of gentlemen. Every student is received as a gentleman, and is expected to behave as such. A small number of law-breakers will destroy the peace and harmony of the College, and become an insufferable annoyance to its officers. Parents and guardians are, therefore, earnestly requested not to send sons or wards here *who have proved ungovernable at home.*

HOUSEHOLD ECONOMY.

Every arrangement is made as to rooms, warmth, lights, lodging, meals, attention of servants, recreations, &c., &c., to make our students contented, comfortable, and happy.

The best groceries the markets afford are purchased for the use of the College, while, from the abundant products of the dairy, farm, and garden, the table is always amply supplied. The *domestic* economy of the College is presided over by the wife of the President, and the *linen department* is in charge of Mrs. Prof. Worthington. These ladies give close and constant attention to the interests committed to their care. Should a student become sick, he will find in the ladies of the Institution the gentle and tender watch-care of nursing mothers or affectionate sisters.

DIVINE WORSHIP.

The students are required to attend family prayers, morning and evening; also, divine worship every Sunday in the College Chapel, (unless excused on account of conscientious scruples, or sickness.) The chapel, on these occasions, is open for the public use.

The principles and *morals* of students are diligently trained, but without the least interference with their church preferences or sentiments. With reference to *politics*, the same course of non-interference is pursued. In the lecture-room, literary societies, and in social life, mere political issues and questions are *practically ignored.*

MILITARY TACTICS.

The Military Course consists of stated drills, and of lectures on tactics.

Students are required to wear a uniform on the Sabbath-day and on parade.

VACATIONS AND TERMS.

The scholastic term is divided into two terms; but in order to prevent the serious interruptions caused by short holidays, there will be but one regular vacation, beginning the last week of June and closing the middle of September.

The first term will open on the 15th of September, and close with the month of January. The second term will begin 1st of February, and end with the College year, the last of June.

When parents or guardians wish their children or wards to visit home, or *elsewhere*, a letter to that effect should be addressed to the President. Frequent visits home or away from the College are disapproved, as they have a tendency to *unsettle* the pupil's mind, and thus disqualify him for giving necessary attention to his studies.

EXPENSES.

PAYABLE IN ADVANCE.

1*st Term.*—Board, lights, fuel, washing, room rents, use of furniture, &c.	$87 50
For tuition in all branches, (including modern languages and military tactics,) use of text-books, &c.	37 50
Matriculation fee	5 00
Total	$130 00

2*d Term.*—Same as first, less the matriculation fee.

Observe: The terms are *strictly in advance*, and pre-payment in every case will be *required*, unless satisfactory arrangement is made with the President of the Faculty for settlement by note at short date.

No deduction will be made for absence, except in case of protracted illness; nor will money be refunded in the case of a student being withdrawn or dismissed during the term, unless at the discretion of the President.

A student's pocket money may be deposited with the Treasurer, and should be limited to a small sum.

Special damages are assessed on those who unnecessarily injure or destroy College property, (where they are known;) in other cases they will be assessed equally upon all the students.

STATE STUDENTS.

By the liberality of the Legislature, we are enabled to receive sixty students from the State, *free of charges for tuition and use of books*, being a deduction of seventy-five dollars per annum. Twelve of these State students will be received from each Congressional district, and where any district fails to apply for the number to which it is entitled, applicants from other districts will be appointed. Applications should be made to the President of the Board of School Commissioners of the respective counties, and, when granted, should reach the President of the College by the first of September.

By order of the Board of Trustees, provision is made by which a limited number of students (not exceeding ten) can make *part payment in labor* for board and tuition.

Parents or guardians who wish to avail of these "State scholarships" should apply immediately, as the number is limited, and there is great demand for them.

UNIFORM AND OTHER CLOTHING.

Arrangements have been made with J. J. Bunting & Co., *Merchant Tailors*, No. 10 St. Paul street, Baltimore, who will promptly supply students with the proper uniforms, at the lowest prices.

Each one must bring a supply of towels, and have each article of clothing marked with full name.

Each student is also required to provide himself with three pairs of white cotton gloves, which can be obtained at the College.

REQUISITES FOR ADMISSION, &c.

1. All candidates for admission to any department of the College must present satisfactory evidence of *good, orderly habits.*

2. Students coming from other institutions must produce *certificates of honorable standing* while members of the same. Also, certificates of *vaccination* from the attending physician, or from other reliable source.

3. Fire-arms of every description, as private property, being prohibited, parents are requested not to allow them to be brought to the College.

4. Applications for admission, or for further information, should be addressed to the President of Maryland Agricultural College, "*Agricultural College P. O., Md.*"

COURSE OF STUDIES.

FIRST PREPARATORY CLASS.

School of Mathematics.	Arithmetic—[oral.] " [written.]
School of English.	Reading, Spelling, Geography; English Grammar, Penmanship; Composition, Elocution; History of Maryland.
School of Natural Science.	Elements of Physics; Inorganic Chemistry; Structural Botany.
School of Languages.	Latin Grammar; Latin Reader; French Grammar, (optional;) German Grammar, "
School of Agriculture.	Occasional light out-door exercise, &c., &c.
School of Military Exercise.	Tactics; Drill.

NOTE.—Thoroughness in spelling, and in the elements of English grammar and arithmetic, is insisted on as *essential* to real progress in subsequent studies.

SECOND PREPARATORY CLASS.

School of Mathematics.	Higher Arithmetic, written and oral; Elementary Algebra.
School of English.	Reading, Spelling; History of U. S. and England; Exercises in English Grammar, Composition, Elementary Book-keeping, Elocution.
School of Natural Science.	Elements of Physics, and Inorganic Chemistry—continued, with experiments; Physiological Botany.
School of Languages.	Latin Grammar, Syntax, Prosody; Cæsar and Ovid; Latin Prose Composition; Greek Grammar and Reader; Xenophon's Anabasis; French Grammar and Reader; German " "
School of Agriculture.	Occasional out-door exercise.
School of Military Exercise.	Tactics; Drill.

FRESHMAN YEAR.

School of Mathematics.	Algebra; Geometry; Arithmetic—[reviewed.]
School of English.	Rhetoric, Composition; History of Greece and Rome; Book-keeping.
School of Natural Science.	Organic Chemistry; Qualitative Analysis; Detection of Alkalies, Earths, Metals, Mineral Acids, Organic Acids; Use of Blow-pipe, Descriptive Mineralogy; Systematic Botany—[in lectures;] Mechanical Philosophy.
School of Languages.	Ancient Geography, Roman Antiquities; Virgil, Cicero; Greek Antiquities, Greek Testament; Homer; Greek and Latin Prose Composition; French Exercises and Translations; German Grammar and Reader.
School of Agriculture, &c.	Theory and Practice of Agriculture, &c.; Arrangement of Farms, Planning of Farm Buildings; Farm Implements, Principles of Tillage; Landscape Gardening, Road-making, &c.; Stock-breeding, &c.
School of Military Exercise.	Tactics; Drill.

SOPHOMORE CLASS.

School of Mathematics.
- Geometry, Trigonometry—plane and spherical;
- Navigation, Mensuration;
- Field Surveying.

School of English.
- Rhetoric, Logic, Composition;
- Elocution, Book-keeping;
- Universal History.

School of Natural Science.

First Term—
- Qualitative Analysis;
- Detection and Separation of the Elements;
- Quantitative Analysis of Salts, Minerals, Ores, Alloys, &c.;
- Practice in Mineralogy.

Second Term—
- Quantitative Analysis of Soils, Manures, Ashes of Plants, Mineral Waters;
- Practice in Mineralogy—continued;
- Entomology.

School of Languages.
- Roman and Greek Antiquities;
- Sallust, Horace's Odes and Epodes;
- Greek Testament;
- Plato's Dialogues, Homer;
- Greek and Latin Prose Composition;
- French Grammar and Reader;
- German Reader.

School of Agriculture.
- Theory and Practice of Agriculture, &c.;
- Arrangement of Farms, Planning of Farm Buildings;
- Farm Implements, Principles of Tillage;
- Landscape Gardening, Road-making, &c.;
- Stock-breeding, &c.

School of Military Exercise.
- Tactics;
- Drill.

JUNIOR CLASS.

School of Moral Philosophy.	Evidence of Natural and Revealed Religion; Moral Philosophy, Political Economy.
School of Mathematics.	Analytical Geometry; Differential and Integral Calculus; Surveying—continued.
School of English.	Mental Philosophy, English Literature; Philosophy of History; Composition, Original Declamation.
School of Natural Science.	Qualitative and Quantitative Analysis; Mineralogy, Geology, Organic Analysis; Chemistry—applied to the arts of dyeing, bleaching, calico printing, &c.
School of Languages.	Livy, Horace's Satires, Epistles, &c.; Antigone, Odyssey, De Corona; Latin and Greek Prose Composition; Moliere's Translations from English Classics into French; Schiller, Lessing, Goethe.
School of Agriculture.	Theory and Practice of Agriculture, &c.; Arrangement of Farms, Planning of Farm Buildings; Farm Implements, Principles of Tillage; Landscape Gardening, Road-making, &c.; Stock-breeding, &c.
School of Military Exercise.	Tactics; Drill.

SENIOR CLASS.

School of Moral Philosophy.	Evidence of Natural and Revealed Religion—continued; Moral Philosophy—continued; Political Economy—continued.
School of Mathematics.	Civil Engineering; Mechanics, Astronomy; Field-Work in Surveying.
School of English.	History of Philosophy; Composition; Original Declamation.
School of Natural Science.	Preparation of Chemicals and their application; Quantitative Analysis.
School of Languages.	Juvenal, Cicero, Tacitus, Quintilian; Original Latin Composition; Prometheus, Alcestis, Demosthenes, Philippics. Thucydides; Written Translations from the Greek; Histories of French and German Literature; Composition on given subjects.
School of Agriculture, &c.	Theory and Practice of Agriculture, &c.; Arrangement of Farms, Planning of Farm Buildings; Farm Implements, Principles of Tillage; Landscape Gardening, Road-making, &c.; Stock-breeding, &c.
School of Military Exercise.	Tactics; Drill.

In the Schools of Languages, Spanish or Italian may be substituted for French or German, or any two of these for Greek.

DEGREES: 1st.—The Degree of Proficient applies to those branches which the student is allowed to attend separately.

2d.—The Degree of Graduate in a school applies to the entire course taught therein.

3d.—The Degree of Bachelor in Philosophy will be conferred upon Graduates in the first four schools.

4th.—The Degree of Bachelor of Arts will be conferred upon Graduates in the first five schools.

5th.—The Degree of Master of Arts will be conferred, in course, upon those who take the Degree of Bachelor of Arts, and maintain, for three years thereafter, the character of a student.

REMARKS.

This Institution, as will be seen from its extensive and varied "course of study," supplies a manifest want of the community. Those who have both *time* and *means* for a thorough collegiate course will find here all the requisite facilities for securing that end. Others, whose circumstances are different, are not required to pursue studies that have no immediate and direct reference to the active business duties of the future towards which they are looking. All such are provided with thorough instruction in those branches which more particularly relate to the chosen vocation.

The studies of each student are assigned by the faculty; and in no case shall a study be omitted from the course without the written instruction to that effect of his parent or guardian to the President.

All the text-books of the course are furnished at the College, and students have use of them free of cost, except in case of loss or damage.

Arrangements have been made by which all students who desire it can receive instruction in music, vocal and instrumental, drawing, and in the science and art of elocution, at a small extra cost.

The Trustees have in contemplation the establishment of telegraphic communication between the College and the cities of Baltimore and Washington, as a convenience for the dispatch of business, as well as an important educational agency.

Regular lessons in practical farming and gardening, horticulture, floriculture, experimental science, and in natural history, are given to every class in College.

Provision has also been made for in-door industrial pursuits, both as a matter of economy and for the benefit of those students who may have a desire for a knowledge of these mechanic arts.

An apartment of the College has been fitted up as a "Reading Room," to which the best Quarterly, Monthly, and Weekly Journals come regularly; among these, some dozen or more of the leading Agricultural periodicals of the country, giving our students thereby the benefit of converse with the freshest and best thoughts of this progressive age. In addition to these, the newspapers of the entire State are received weekly, thus supplying our young men with agreeable and instructive light reading, and, at the same time, keeping up their knowledge of, and interest in, the affairs of their respective counties.

COLLEGE RULES.

1. Students shall be subject to the laws and government of the College, and show in speech and behavior all proper tokens of respect and obedience to the Faculty; and are expected to conduct themselves, on every occasion, with the propriety and decorum which characterize the society of gentlemen.

2. Students shall observe order in their rooms, as well as in every part of the College buildings and grounds. Loud talking, scuffling, boisterous behavior, throwing water or stones, or unnecessary noise of any kind, is strictly prohibited at all hours, in any portion of the building.

3. If any student is known to indulge in habits injurious to the morals of the College, or calculated to destroy the established order, he will be immediately dismissed.

4. Any student who shall be intoxicated, or shall use, or bring within the College grounds, or have in his room, any spirituous, vinous, fermented, or other intoxicating drinks, shall, for the first offence, receive such punishment as may be inflicted by the Faculty; but for a second offence of a similar kind shall be dismissed from the Institution.

5. Gambling and card-playing of every description are strictly prohibited, and will be punished in the discretion of the Faculty.

6. Profane, obscene, or vulgar language or conduct is strictly prohibited, and will be punished by the Faculty.

7. No student shall absent himself from the College farm without first obtaining the permission of the President.

8. Students are not to join any convivial club or other association, nor shall any general meeting be called or held by them for any purpose without the express permission of the President.

9. No fire-arms or fire-works of any description, or gunpowder in any form, shall be introduced by any student within the walls of the College; nor shall the same be used by any person within the enclosure of the College farm without the sanction of the President.

10. All persons are strictly forbidden to cut, mark, or in any manner deface or injure the walls, buildings, porches, or public property of any kind. Any one so offending will be required to make good such damage or injury, and be otherwise punished as the case may require.

11. Students are not to congregate, for social or other purposes, in the halls, nor sit on the stairs or front steps, nor *lounge* or *stand* on the *porch* or *grounds* in *front of the College.* They are also forbidden to *smoke* in the *halls* or on the *front porch*, or to *play* or *smoke* on the *grounds in front of the buildings.* They are also required to leave the hall immediately after roll-call, and are not allowed to use the *south* stairs of the College at any time.

12. Study hours, except on Saturday and Sunday, are from 8¼ A. M. to 12 M., from 2 to 4 P. M., and from 7 to 10 P. M. During these hours, students must be quiet, and stay within the building. Visiting from room to room during study hours is forbidden, unless by express permission of the President, or, in his absence, by some member of the Faculty or military officer. And in going to and from the recitation and their own rooms, students must *walk* in an orderly manner. Loud talking, whistling, or noise of any kind in the rooms or halls, or *running* up or down stairs, is *strictly forbidden.*

13. On Saturday, and *especially* on Sunday, the same quiet order shall be maintained in the rooms and halls as on other days. But this rule shall not be construed to forbid students visiting each other's rooms, provided that not more than two visitors shall be in any room at a time.

14. No student shall resort to the kitchen or visit the dining-room, (except during meal hours,) without special permission of the President or some member of the Faculty.

15. Tasks, or other punishment, may be inflicted for absence from prayers, meal rolls, from church, or absence from class, without permission *previously* obtained.

16. The student's room shall be subject to inspection at any and at all hours. Want of neatness, &c., shall be punished as the President may determine.

17. In proceeding to meals, and while at table, every one is expected to conduct himself with gentlemanly propriety. Noisy conversation, loud calling to servants, or rattling of dishes, &c., will not be allowed.

18. Those who wilfully disregard the letter and spirit of the rules of the College are punished with demerits. When the demerit marks of any student reach 5 in number, he will be warned by the President in private; when his demerits reach 10, the President will again warn him, and advise his guardian of such action, with the reasons therefor; for 15 demerits he shall be requested to *withdraw* from the Institution.

19. In matriculating, each student is furnished with a copy of the Rules, and is understood as pledging himself to obey them.

20. The Faculty and military officers are required to report all students who violate the Rules or any regulations of the College.

DO NOT CIRCULATE
